Extend access to stakeholders outside Windchill

Portal provides secure, role-based access for stakeholder to view documents, CAD data and reports,.

Organizations can **share critical information** with stakeholders without requiring them to navigate the complexity of the Windchill interface.

Delivered on the Windchill Extension platform.

➔ Key Features

- Web-based portal for simplified access.
- Configurable to add searches for all types of business object.
- Give direct access to documents, reports and representations.
- Can link to external systems.
- Controlled visibility through user roles and permissions.
- Direct delivery of Windchill-generated reports.

➔ Benefits

- Extends the value of Windchill beyond core users.
- Simplifies collaboration.
- Protects sensitive data while providing transparency.
