Report Designer

Design and generate reports with intuitive control

The Report Manager provides a graphical interface within Windchill for building detailed PDF reports. With **drag-and-drop** functionality and flexible formatting, it enables users to create professional-grade documents tailored to their business needs.

Reports can be downloaded independently or merged to existing Windchill PDFs, ensuring **seamless integration** with existing document business processes.

⊙ Key Features

- Drag-and-drop report design with vertical layout.
- Full API support
- Dynamic XML creation
- PDF merging to add shared content
- Configurable access to business data
- Flexible formatting of business data
- Seamless integration of change data
- Import/export of templates as Windchill extensions for rapid production deployment

⊙ Benefits

- Design reports for external stakeholders without custom development.
- Ensure consistent, branded reporting across the organization.
- Reduce reliance on IT for routine report adjustments.

Reporting Portal

WINCOM

Extend Reporting access to stakeholders outside Windchill

Portal provides secure, role-based access for non-Windchill users to view reports and documents.

Organizations can **share critical information** with suppliers, partners, and internal stakeholders without requiring them to navigate the complexity of the Windchill interface.

Click here to begin your no-cost trial.

⊕ Key Features

- Web-based portal for simplified access.
- Configurable to add searches for all types of business object.
- Can link to external systems.
- Controlled visibility through user roles and permissions.
- Direct delivery of Windchill-generated reports.

⊕ Benefits

- Extends the value of Windchill beyond core users.
- Simplifies collaboration with external partners.
- Protects sensitive data while providing transparency.

WINCOM

Document Worker

Automate PDF conversion for consistency and compliance

Office Worker automates the conversion of all types of **Microsoft Office documents into standardized PDF.**

By integrating this process directly into Windchill, organizations can reduce manual file handling and ensure consistent document output.

→ Key Features

- Conversion of any office document to PDF.
- Batch processing for large volumes of documents.
- Seamless integration with existing Windchill document workflows.
- Supports AutoCAD.

→ Benefits

- Save time by eliminating manual conversion steps.
- Ensure compliance with document standards.
- Reduce version control risks by keeping documents within Windchill.
